Assignment 02  
Analysis Report  
Submitted: October 12<sup>th</sup>, 2018

This report contains the visual + descriptive analysis of the autoencoder architecture trained in the attached *.ipnb* file.

## **1 2-2 Conv-Conv Design:**

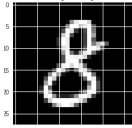

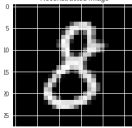

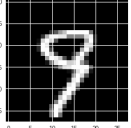

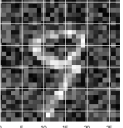

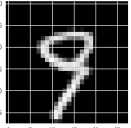

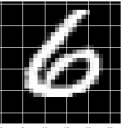

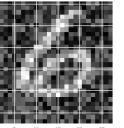

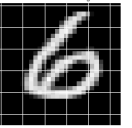

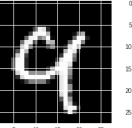

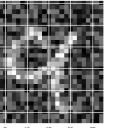

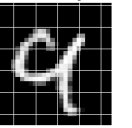

This design has 2 encoder and 2 decoder layers. The analysis is divided into three parts:

- Effect of varying LR on constant batch size and epoch.
- Effect of varying batch size on constant LR and epoch.
- Effect of varying epoch on constant LR and batch size.

## 1.1 Varying LR:

· Batch size = 32 and Epochs = 10.

Table 1:

Epoch	M.S.E. @ LR=0.1	M.S.E. @ LR=0.01	M.S.E. @ LR=0.001	M.S.E. @ LR=0.0001
1	0.005940	0.008400	0.014045	0.045864
2	0.004542	0.006082	0.008670	0.017278
3	0.004184	0.005550	0.007915	0.013715
4	0.003933	0.005290	0.007434	0.012317
5	0.003759	0.005113	0.007090	0.011503
6	0.003614	0.004989	0.006821	0.010939
7	0.003496	0.004879	0.006613	0.010531
8	0.003392	0.004793	0.006440	0.010204
9	0.003308	0.004709	0.006283	0.009932
10	0.003232	0.004640	0.006153	0.009696
	<div><div><div>Original Image</div></div><div><div>Noisy Image</div></div><div><div>Reconstructed Image</div></div></div>	<div><div><div>Original Image</div></div><div><div>Noisy Image</div></div><div><div>Reconstructed Image</div></div></div>	<div><div><div>Original Image</div></div><div><div>Noisy Image</div></div><div><div>Reconstructed Image</div></div></div>	<div><div><div>Original Image</div></div><div><div>Noisy Image</div></div><div><div>Reconstructed Image</div></div></div>

## 1.2 Varying Batch Size:

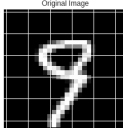

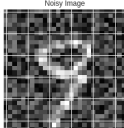

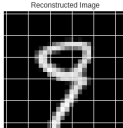

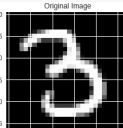

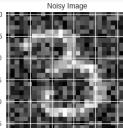

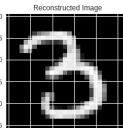

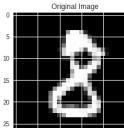

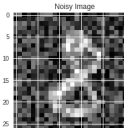

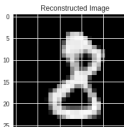

· LR = 0.1 and Epochs = 10.

Table 2:

Epoch	M.S.E. @ BS=16	M.S.E. @ BS=32	M.S.E. @ BS=64	M.S.E. @ BS=128
1	0.005940	0.008400	0.014045	0.045864
2	0.004542	0.006082	0.008670	0.017278
3	0.004184	0.005550	0.007915	0.013715
4	0.003933	0.005290	0.007434	0.012317
5	0.003759	0.005113	0.007090	0.011503
6	0.003614	0.004989	0.006821	0.010939
7	0.003496	0.004879	0.006613	0.010531
8	0.003392	0.004793	0.006440	0.010204
9	0.003308	0.004709	0.006283	0.009932
10	0.003232	0.004640	0.006153	0.009696
<div> <div> <div>Original Image</div> <div>Noisy Image</div> <div>Reconstructed Image</div> </div> <div> <div>Original Image</div> <div>Noisy Image</div> <div>Reconstructed Image</div> </div> <div> <div>Original Image</div> <div>Noisy Image</div> <div>Reconstructed Image</div> </div> <div> <div>Original Image</div> <div>Noisy Image</div> <div>Reconstructed Image</div> </div> </div>				

### 1.3 Varying Epochs:

· LR = 0.1 and Batch Size = 32.

Table 3:			
Epoch	M.S.E. @ Epoch=10	M.S.E. @ BS=100	M.S.E. @ BS=500
1	0.005940	0.	0.
2	0.004542	0.	0.
3	0.004184	0.	0.
4	0.003933	0.	0.
5	0.003759	0.	0.
6	0.003614	0.	0.
7	0.003496	0.	0.
8	0.003392	0.	0.
9	0.003308	0.	0.
10	0.003232	0.	0.
<div> <div>Original Image</div>  <div>Noisy Image</div>  <div>Reconstructed Image</div>  </div>			
...		...	...
100		0.002229	0.002193
<div> <div>Original Image</div>  <div>Noisy Image</div>  <div>Reconstructed Image</div>  </div>			
...			...
500			0.001136
<div> <div>Original Image</div>  <div>Noisy Image</div>  <div>Reconstructed Image</div>  </div>			

The trained architecture is inspired from [here](#).
